

Phonetic Learning System

Why Phonics in Kindergarten?

Over **70% of children struggle with reading** in the early grades, often due to a weak foundation in phonics.

This can lead to difficulties in spelling comprehension, and overall language development.

Our **Phonetic Learning System** introduces letters through sounds, helping young learners understand the connection between letters and their corresponding sounds. This makes it easier for children to

- **Recognize letters**
- **Blend sounds**
- **Form words**

By building a strong phonics foundation, we aim to **spark a lifelong love for reading** while equipping children with essential literacy skills.

Beginner

➤ For Those who don't even know **English Letters**

- Letters Identification
- Letter reading
